1. Overview PT. Mitra Sangkara Abadi (MSA)

PT Mitra Sangkara Abadi is a company established in Jakarta on September 27, 2021. The idea to establish a company PT Mitra Sangkara Abadi has been started since 2017, starting as a financial-based digital company. The separation of business lines was carried out by the holding company PT Mitra Sangkara Abadi and then made it an independent subsidiary until now. PT Mitra Sangkara Abadi is expected to continue to develop into a company that owns digital tokens, as well as a company in the service sector for other companies that want to do TOKENIZATION.

This technology, which was started in 2011, is increasingly attracting market interest and this is the basis for a lot of digital processing of data and assets. The emergence of NFT (Non Fungible Token), DEFI (Decentralized Finance), and various new developments in the blockchain world certainly ensure that the future of Digital Technology begins today. Blockchain technology for PT Mitra Sangkara Abadi is the future in the digital world, it's just that PT Mitra Sangkara Abadi does not want to enter "carelessly" in this world. PT Mitra Sangkara Abadi wants to ensure that the Crypto Assets created and owned by PT Mitra Sangkara Abadi have a proper and safe base value for the people who buy them.

This makes PT Mitra Sangkara Abadi create a token called SANGKARA \$MISA which is based on ownership of fixed assets as the underlying. PT Mitra Sangkara Abadi even strives to be a pioneer in the TOKENIZATION process in Indonesia, not only making crypto assets as a means of speculation, but making crypto assets like holding part of the ownership of a company. The existence of this underlying also makes crypto assets not move freely like without a base and only based on rumors, and the SANGKARA \$MISA token will also move based on the company's fundamentals.

Broadly speaking, PT Mitra Sangkara Abadi is a company engaged in the Crypto, Blockchain, Metaverse, NFT and Ecosystems in Indonesia. This company is purely 100% owned by the Indonesian side and there is not the slightest foreign interference in terms of ownership, systems or technology.

One of our products that has been launched by PT Mitra Sangkara Abadi is a token called Sangkara Misa. This token has been listed on various World Centralized Exchanges such as Probit, Coinstore, Lbank, Bitrue, Bitmart, Hotbit, and Digifinex. This token has also been officially registered on Coin Market Cap and Coin Gecko, besides that as KYC validation, this token has also carried out a Certik Audit.

3. Organizational structure

In connection with the dynamics and development of the organization in the company, we announce that "the man of behind the gun" at PT Mitra Sangkara Abadi, our CEO named Agustino Wibisono. The profile of him is as follows:

Agustino Wibisono

Born in Semarang City, Central Java in 1983, graduated from the Faculty of Industrial Engineering, Atmajaya University, Yogyakarta, he started his career as a Software House and Cafe since 2004 in Yogyakarta. However, after the big earthquake in Yogyakarta in 2006, he decided to move to Jakarta and started his career by working at one of the national private banks in Indonesia, then ended his career in banking in 2016 with his last position as branch manager in Semarang City. . After that he continued his work as a consultant for foreign companies and also started small investments in several local and foreign startups. Some of his portfolios are Bantaya Hall, KYCK Singapore, Green House, Nabis US, and Caldera US

4. Company Vision and Mission

Vision :

Create a stable crypto market and allow anyone to own digital assets safely.

Mission :

- 1) Creating a trusted crypto exchange
- 2) Making crypto transactions easier and safer
- 3) Creating an Indonesian crypto market using a stable token native to Indonesia.
- 4) Assist in the token issuance process for various businesses, including making NFT tokens for Indonesian Artists (in collaboration with www.bantayahall.com, pamorstudio.com, batikid.com, sangkaraland.io, sangkaranft.com)
- 5) Bringing Indonesia's original stable token to the international world

5. Company business plan

5.1. Purpose of Use of Funds

The funds raised from the \$MISA token sale will be used to:

1. Increase the value of protective assets (*underlying assets*)
2. Buy or create a token exchanger in Indonesia, for native Indonesian tokens
3. Issuing tokens for start-ups and MSMEs that need working capital (**Tokenization**) .
4. Investment in Conventional Business with trusted partners, together with <https://apedi.id/>, especially in the field of Agriculture and also optimizing the **Warehouse Receipt Market Place** for Apedi members through the Sipadu – Smart Desa program.
5. Investments in digital business startups include **making NFT** for all Indonesian Artists in collaboration with **Bantaya Hall**, production house **Pamor Studio**, and NFT Batik in collaboration with **Batik Semar Solo**.
6. Developing NFT in agriculture and plantations with the support of a team from PT Bumi Meta Indonesia (**www.SangkaraLand.io**), and in collaboration with Rimaunangis SDN BHD (RNT) as the first overseas partner to tokenize its traditional business.

1. Increasing Protective Asset Value

- ❖ The asset that protects the value of the Sangkara \$MISA token is a productive plantation in the Pemalang area of Central Java and also several assets belonging to the founders who helped guarantee the value of the SANGKARA \$MISA token at the beginning of its establishment.
- ❖ The value of this asset will be increased by utilizing this land into an agricultural land so that it will become more profitable.
- ❖ PT Mitra Sangkara Abadi plans to use the existing land to cultivate cassava plants with superior quality seeds to meet market share, especially the high demand for cassava from abroad.
- ❖ PT Mitra Sangkara Abadi also plans to establish a cassava processing plant so that Indonesian cassava production has a suitable yield for export. This processing factory will also receive cassava products from local farmers, so that PT Mitra Sangkara Abadi can have a positive impact on the surrounding environment.

2. Create an Exchanger for Indonesian native tokens

- ❖ Public interest in crypto investment in Indonesia has begun to increase significantly, especially since the government recognized crypto as a digital asset that has become a trading commodity. The Indonesian government is in the process of establishing a crypto asset exchange, clearing house, and custodian to support the Indonesian crypto asset ecosystem. Furthermore, the government will continue to monitor the development of this extraordinary transaction and customer value so that crypto asset trading in Indonesia remains on the right corridor.
- ❖ In Indonesia, crypto assets are categorized as commodities that can be traded on futures exchanges. The Ministry of Trade through the Badan Pengawas Perdagangan Berjangka Komoditi (Bappebti) has issued the latest regulation to accommodate the physical trading of crypto assets in Indonesia, namely CoFTRA Regulation Number 8 of 2021 concerning Guidelines for the Implementation of Physical Trading of Crypto Assets on the Futures Exchange. Completeness of related technical arrangements in the form of input from other ministries/institutions is accommodated in Bappebti regulations. This arrangement includes the mechanics of physical trading of crypto assets.
- ❖ Data released by the Ministry of Trade shows the development of crypto asset trading is getting more interesting from year to year. The Ministry of Trade (Kemendag) noted that the growth in transaction value and the number of crypto asset customers in Indonesia was extraordinary. In 2021, the total transaction value of crypto assets will reach IDR 859.4 trillion or an increase of 1,224 percent compared to 2020 which reached IDR 64.9 trillion. There were 14.6 million registered buyers.
- ❖ With the increasing enthusiasm of the community, PT Mitra Sangkara Abadi intends to establish an exchange that can accommodate and distribute the coins created by the nation's children and also make this crypto investment easily accessible to investors who want to invest in crypto.
- ❖ Unlike other exchanges in Indonesia, PT Mitra Sangkara Abadi will also become an exchanger that can accommodate the underlying assets of token creators who wish to list their tokens accompanied by underlying assets so that PT Mitra Sangkara Abadi will not only become an exchanger that facilitates coins on the market. generally, but PT Mitra Sangkara Abadi will facilitate tokens that have an underlying.

3. Token issuer

- ❖ Indonesia is one of the 10 countries with the largest number of startups in the world in 2022, according to the Startup Ranking report. It is recorded that there are 2,346 startups in the country and this number puts Indonesia in fifth place in the world.
- ❖ The development of MSMEs in Indonesia is considered quite rapid when viewed from the large number of MSMEs, so it is not surprising that MSMEs are the pillars of the country's economic growth. In the last 5 years, the contribution of MSMEs in Indonesia to Gross Domestic Product (GDP) increased from 57.8% to 61%. This makes MSMEs a safety net as well as an economic driver because the development of MSMEs in Indonesia has a fast transaction cycle and their products tend to be directly related to the main needs of the community. The number of MSMEs in Indonesia is also fantastic, reaching 65 million in 2021. Of these, not a few startup companies and MSMEs need funds to start or develop their business.
- ❖ The presence of PT Mitra Sangkara Abadi is expected to be able to help startups and MSMEs by issuing tokens to raise funds or capital in addition to borrowing.

4. Enter into Conventional Business. with a trusted partner

- ❖ PT Mitra Sangkara Abadi inaugurated a collaboration with the Indonesian Village Entrepreneurs Association (APEDI), on Wednesday, November 10, 2021. This collaboration is to provide convenience for financing farming businesses with a digital system through Blockchain Technology in the form of Tokenization. Tokenization is the process of converting various forms of assets in the real world into the form of a token that can be transferred, stored, and recorded in blockchain technology. Tokenization can also be regarded as a form of conversion of a value owned by a certain asset to become a token.
- ❖ The Indonesian Village Entrepreneurs Association also handed over rights to 100 hectares of agricultural land to PT Mitra Sangkara Abadi (MSA) as part of the guarantee of the Agricultural cooperation between MSA and Apedi in accordance with the agreement with MSA that Apedi will provide a lot of managed land as collateral for capital carried out by MSA . The land area of 100 hectares is currently divided in 3 different provinces, West Java, Banten and East Java. With a total target of 100,000 hectares of land under management by the end of 2023, Apedi and MSA will bring Indonesia to real food security. Not only land and investment, MSA according to its

commitment at the beginning of the MOU, will bring digitalization to Indonesian agriculture.

- ❖ With this collaboration with APEDI, PT. Mitra Sangkara Abadi has become more confident in entering businesses that are indeed the expertise of APEDI members, namely agriculture and plantations. With the APEDI slogan "Organic Emergency", it is hoped that PT. Mitra Sangkara Abadi can enter into the organic farming and plantation business controlled by APEDI.
- ❖ MSA and APEDI collaboration, Digital Industry 4.0 is not only enjoyed by urban communities, especially real work will also be carried out by MSA by preparing an offtaker system and financing for agriculture, plantations and livestock based on a digital application called the Sistem Pemantauan Desa Terpadu (SIPADU).
- ❖ In SIPADU, the original produce from the village will appear, when it was harvested and also the contact from the owner of the harvest, so that buyers can schedule purchases. This will also help the Ministry of Trade's online warehouse receipt program.
- ❖ Of course, apart from Plantation and Agriculture, PT. Mitra Sangkara Abadi will also enter the trading business by becoming an "off-taker" partner of agricultural products produced by APEDI members in particular, and all village entrepreneurs in general. PT. Mitra Sangkara Abadi will help the owners of the **RESI WAREHOUSE** of agricultural products to be integrated into the **SIPADU** application (**Sistem Pemantauan Desa Terpadu - SMART DESA**), so that all crops that are not absorbed by the market can be sold nationally and internationally using the online method here.
- ❖ As for village entrepreneurs who are not touched by financial institution financing, MSA will help provide capital. The financing is carried out in an organic way, namely the provision of seeds, fertilizers and other production needs and the results will be purchased by MSA partners. Furthermore, APEDI will be in charge of capital participation for these village entrepreneurs.
- ❖ Funding carried out in the form of Sangkara Misa tokens will have a significant impact on Indonesian Agriculture. Currently, many Indonesian farmers have difficulty in capital and do not have access to financial institutions. This collaboration between MSA and Apedi will bring direct financial inclusion to farmers using the Sangkara Misa token.

5. Sangkara Token investment into business digital startup

A. www.sangkaranft.com.

- Digital assets in the form of works of art or collectibles that can be used to buy things virtually are called Non-Fungible Token (NFT) businesses.

- PT Mitra Sangkara Abadi (MSA) as the owner of SangkaraNFT.com started a new history by collaborating with an experienced production house in Indonesia, namely Making Name Studio (MNS).
- The purpose of this collaboration is so that SangkaraNFT can become a means of support for Indonesian Art Workers to continue to work and of course their work will be appreciated in the era of the Digital world and bring the works of Indonesian art workers to the International World and ensure that the creativity of Indonesian NFTs will be more colorful and quality.
- The native *marketplace* for this nation's children can hit Indonesia's NFT world with various features that are only offered on the sangkaraNFT.com site, including *Staking, Subscribe, Follow, and Contributor* features. NFT is not just a collectible item in Sangkara, but can also be an investment tool that can generate returns by working with certain tokens,

B. www.bantayahall.com

- One of them is currently being developed is PT. Bantaya Mega Kreasi, which is newly established and is engaged in paid Online Streaming, namely www.bantayahall.com. This music community will become one of the productive communities in the SANGKARA \$MISA Token market.
- All Live Concert Videos at Bantaya hall, will be turned into NFT (Non Fungible tokens) which can be traded and stored as collectibles. This will create a solid foundation for Indonesia's native NFT tokens. This will also benefit Indonesian musicians in maintaining the copyright of their work.
- The first Indonesian online concert platform Bantayahall.com has successfully held its third concert at the Jakarta Arts Building (GKJ) on Tuesday, November 30, 2021. The concert, which is supported by famous Indonesian musicians, is intended to commemorate and honor the late Steven Kaligis. This concert was attended by many Indonesian musicians, such as Melanie Subono, Arie Dagiengk, Ifan Seventeen, Iwa K, Ujan Sisitipsi, Kikan Chocolate, IwaOus, and Aponk The Ikan Bakar.
- Bantayahall.com, which is part of Mitra Sangkara Abadi (MSA) which owns the Crypto token SANGKARA \$MISA (www.misatoken.com) is committed to helping Indonesian artists create non-fungible tokens (NFT). With NFT, it is hoped that the works of Indonesian artists will be better known to the world and appreciated more in terms of originality and creativity and of course materially also sufficient. These artists' NFTs

PT. Mitra Sangkara Abadi
The Boulevard Office Tower Lt. 6 Suite B1-B2
Jl. Fachruddin No.5 Tanah Abang - Jakarta Pusat
DKI Jakarta 12950

will be posted on MSA's marketplace in our first NFT store at www.bakerswap.org
at www.sangkaranft.com.

C. www.pamorstudio.com

- PAMOR STUDIO is a Production House under the auspices of PT. MSA, as well as a place that accommodates all the creativity of young filmmakers by issuing a platform in the form of a website and mobile application.
- PAMOR STUDIO carries the concept of Tokenization, where this token is NOT FOR SALE separately, but is part of the PAMOR STUDIO VVIP Membership which can provide potential income for its members.
- \$MORE token holders have the potential to get Rewards Points which will be distributed as a form of appreciation for PAMOR STUDIO, because they have joined the PAMOR STUDIO core family to realize the company's VISION and MISSION.
- PASTIMOORE (\$MORE) BSC Network - BEP 20 with Token Supply : 10,000,000 (Ten Million Tokens) and 90% Public ownership | 5% Founder | 5% Company
- The advantages of being a Pamorstudio member are:
 - Membership at www.pamorstudio.com for life
 - Get FREE TOKEN \$MORE which supply is limited
 - Get potential income in the form of Reward Points that can be disbursed from every film produced by Pamor Studio (T&C Applicable).

D. NFT Batik

- Batik Semar, one of the well-known batik brands in Indonesia, seeks to combine cultural heritage and the digital era by exploring the world of non-fungible token (NFT) blockchain.
- In collaboration with PT Mitra Sangkara Abadi (MSA), Batik Semar will have its own NFT and even this Batik Semar NFT is claimed to be the first batik NFT in Indonesia.
- For certain batik purchases, customers can get exclusive NFT Batik Semar which can also be traded through special platforms, such as OpenSea, where every purchase of certain batik can get NFT Exclusive Batik Semar from the product purchased and of course the NFT will be traded.

6. Developing NFT in agriculture and plantations with the support of a team from PT Bumi Meta Indonesia (www.SangkaraLand.io), and in collaboration with **Rimaunangis SDN BHD (RNT)** as the first overseas partner to tokenize its traditional business (**5Harvest0**)

- Rimaunangis SDN BHD (RNT) is a Malaysian company that created the First NFT in Malaysia based on traditional corporate business as an effort to change the way the

blockchain world is viewed in Malaysia. Rimaunangis Company believes that the financial world will turn digital in the future

- PT Bumi Meta Indonesia (5Harvest0) is the metaverse's first real-world land & asset ownership platform, enabling users to buy, sell, stake, earn and develop NFT based land tiles mapped to real map surfaces. With ownership comes the opportunity to farm, mine, build, collaborate and turn peasant land into something more than the sum of its parts. 5harvest0 wants to elaborate and elevate the concept of the metaverse to another level that has an impact on the real world and society.
- PT Mitra Sangkara Abadi collaborated with Rimaunangis RNT and assisted by the 5Harvest team. They believe that blockchain technology can be one of the solutions in financial inclusion for farmers and ranchers throughout Malaysia through the NFT world which is combined in Metaverse, so that it can help and have traditional businesses in plantation and livestock sector. The NFT owned by Rimaunangis RNT will be marketed globally, and will automatically bring in investment in the agribusiness world in Malaysia. RNT has seen MSA's success in developing this Agricultural NFT business in Indonesia and in their efforts to help communities have traditional businesses in the plantation and animal husbandry sector.
- The collaboration for signing the MSA agreement with RNT was carried out in Kuala Lumpur on July 7, 2022, where this collaboration is a merger of traditional and digital businesses in one unit, especially Malaysia as a country that has similarities with Indonesia culturally and culturally, so it is appropriate if this collaboration is carried out for potential development. traditional business.
- This NFT, which was developed with MSA, is something new in the Blockchain world because so far most NFTs or Krypto tokens in general do not have any underlying, while MSA's NFT has underlying assets.

7. Token \$MISA

The \$MISA token is the first token created by PT Mitra Sangkara Abadi to include a productive asset as a hedge of the token. With the existence of an asset that protects the value of this token, it is expected to provide a sense of security for the investments made by investors or buyers of the \$MISA token.

This form of protection is implemented in a binding smart contract, where token holders have an option to convert the Sangkara \$MISA token into shares in PT Mitra Sangkara Abadi or the Sangkara \$MISA token can be sold on the market after the token is registered on an official exchange. in Indonesia and other countries.

8. Problems In Crypto Investment

- ❖ Cryptocurrencies are not tied to fundamentals. In cryptocurrency investing, none of these basics are available. This virtual currency has no fundamentals and therefore has no real value. We buy coins and hope more people want to buy coins later, which means we can get more currency back later.
- ❖ Cryptocurrencies are seen as pure speculation because cryptocurrencies are highly volatile. The majority of cryptocurrency investments take place on decentralized exchanges, without big investors like pension funds.
- ❖ Cryptocurrency is still unregulated because while many people want to adopt cryptocurrency in their daily lives, but very few businesses actually accept it as payment.
- ❖ Investment risk, he explained, is relatively large because the medium of exchange only uses cryptography, there is no guarantee of assets from the investments invested and price fluctuations are also very high, making it one of the most speculative trading transactions.
- ❖ Another risk that needs to be watched out for is that cryptocurrency trading positions do not become assets, but are traded like market derivatives, as well as the large number of tokens that are freely sold using the Decentralized Finance (De-FI) method and the absence of special regulations governing cryptocurrencies, this condition has the potential large opportunities for fraud, embezzlement and fraudulent transactions.

9. Solution

- ❖ MSA created a token called SANGKARA \$MISA which is based on ownership of a fixed asset as the underlying. MSA will be a pioneer in the TOKENIZATION process in Indonesia, not only using crypto assets as a means of speculation, but also making crypto assets like holding part of the ownership of a company. With this Underlying, Krypto assets do not move freely like they are without a foundation and are only based on rumors. The SANGKARA \$MISA token will also move based on the company's fundamentals.
- ❖ The \$MISA token has been sold through seven world exchanges namely Coinstore, Lbank, Probit, Bitrue, Hotbit, Bitmart and Digifinex, and has been listed on Coin Market Cap and Coin Gecko. Currently, the \$MISA Token is being analyzed by Bappeti to be traded on official exchanges in Indonesia. The \$MISA token will also include an underlying asset that hedges the value of the token that is deposited in a binding smart contract.

10. Potential Profits for Investors Token Sangkara \$MISA

- ❖ Profits from each business pillar will be distributed in an airdrop to Sangkara \$MISA token holders
- ❖ The increase in the price of tokens in the market because this token was built by having fundamentals in traditional businesses, namely agriculture and digital businesses, namely metaverse, NFT marketplace, music, and also films.
- ❖ The underlying value keeps growing
- ❖ Sangkara \$Misa assets are digital, meaning they treat Crypto assets as part of the company itself and make the company the underlying. "More or less like a stock but in token form"

11. PT MSA Partners

Currently, there are several MSA Partners that have the potential to be developed in both digital and conventional businesses:

1. APEDI (Asosiasi Pengusaha Desa Indonesia - www.apedi.id) - SIPADU
2. PT. Bantaya Mega Kreasi (<https://www.bantayahall.com>)
3. PT Harmoni Mega Pratama Indonesi (<https://pamorstudio.com/>)
4. <https://www.sangkaranft.com> (Market Place NFT yang dikembangkan bersama dengan Bantaya)
5. There are 2 in the development of PT. Mitra Sangkara Abadi together with several MSMEs and Artists, namely www.indonesialeaf.com (for NFT MSMEs Based on Ecology Printing) and www.batikid.com (NFT specifically for batiks from all over Indonesia).
6. The Sangkara \$Misa token has been registered on 7 world exchanges, namely: coinstore, bitmart, bitrue, dgifinex, probit, Lbank, hotbit, Coin market cap, Coin gecko, and has received a smart contract certificate from Certix.
7. PT Bumi Meta Indonesia (5Harvest0 - <https://sangkaraland.io/>) adalah platform kepemilikan tanah & aset dunia nyata pertama di metaverse,
8. PT Rimaunangis SDN BHD (RNT), which is a Malaysian company that created the First NFT in Malaysia based on traditional businesses in the plantation and animal husbandry sector.
9. Several Indonesian Crypto Communities

These partners will grow as time goes on and MSA is growing in the number of holders and the fundamental value of the company.

12. Underlying and Issuing Company Tokens

Currently PT Mitra Sangkara Abadi has the following fixed assets: :

- Plantation land in Pemalang / Central Java, with details as follows:
 - a. SHM 00595 / Karang Sari Large 150m² a/n Agustino Wibisono
 - b. SHM 00596 / Karang Sari Large 250m² a/n Agustino Wibisono
 - c. SHM 00597 / Karang Sari Large 486m² a/n Agustino Wibisono
 - d. SHM 00598 / Karang Sari Large 1.841m² a/n Agustino Wibisono
 - e. SHM 00599 / Karang Sari Large 250m² a.n Agustino Wibisono
 - f. SHM 00796 / Nyalembang Large 2.830m² a/n Agustino Wibisono

- Industrial Land in Wonogiri -Central Java, with details as follows :
 - a. SHM 1790 / Pondok Large 4.930m² a/n Agustino Wibisono

- Tanah dan Bangunan di beberapa kota sebagai berikut :
 - a. SHM 00984 / Tembok Luwung / Large 120m² a/n Sisilia Silvia Dolim
 - b. SHM 00795 / Tembok Luwung / Large 149m² a/n Sisilia Silvia Dolim
 - c. SHM 00803/ Tembok Luwung / Large 116m² a.n Sisilia Silvia Dolim
 - d. SHM 00797 / Tembok Luwung / Large 368m² a.n Sisilia Silvia Dolim
 - e. SHM 00632/ Mintaragen / Large 139m² a.n Sudjoko Sugeng
 - f. SHM 03107 / Mintaragen / Large 95m² a.n Agustino Wibisono

Disclaimer :

All assets listed are still owned by individuals and, will be legally owned, so that they become legally owned by MSA. This will make MSA already has a hedge of all tokens owned.

14. Why Choose SANGKARA (\$MISA) Token

From the beginning, PT. Mitra Sangkara Abadi has proclaimed itself as the first token in Indonesia that has underlying assets, in addition to PT. Mitra Sangkara Abadi itself is a legal entity and is recognized in the Unitary State of the Republic of Indonesia. In fact, until now there is no token or we are familiar with the term Cryptocurrency in Indonesia which really has assets in the real world as a protector of token buyers.

By having a Fixed asset as the underlying, the value of the token will be protected from the possibility of becoming ZERO, or not worth anything at all. In addition, Sangkara \$MISA's decision for initial listing on CEX (Centralized Exchanger) will certainly be a strong reason that will make this token liquid and can be traded anywhere.

Talking anywhere, PT. Mitra Sangkara Abadi is committed to its roadmap, not only listing on Indonesian Exchangers, but also listing on exchanges of various countries. Currently, the Sangkara \$Misa Token has been listed on seven world exchanges and has been listed on Coin Market Cap and Coin Gecko. With this commitment, it will certainly make the SANGKARA \$MISA token the most liquid native Indonesian token traded.

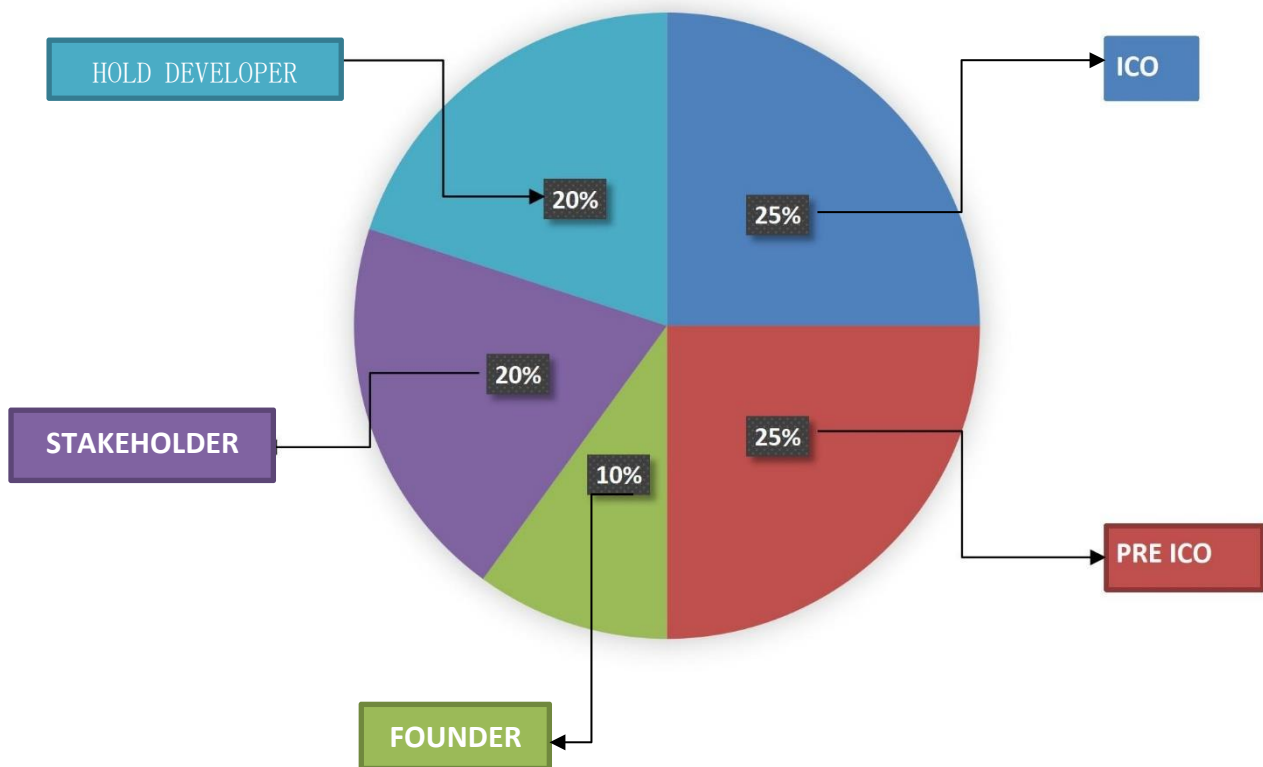

The existence of the Sangkara \$Misa token has also been recognized by the international community, it is proven that the Sangkara \$Misa Token is always involved in large events, such as being the main sponsor of the BNB Chain event in Malaysia 24-25 June 2022 and being a Co-host of the World Summit Blockchain in Singapore. July 15, 2022.

PT Mitra Sangkara Abadi also cooperates with one of the big companies in Malaysia, namely PT Rimaunangis SDN BHD (RNT), which is a Malaysian company that created the First NFT in Malaysia based on traditional businesses in the plantation and animal husbandry sector.

This should be an obvious reason why the SANGKARA \$MISA token can be used as a viable digital asset option to own. Not just ordinary tokens, but tokens that really have value in the real world.

15. Tokenomic

Total Supply Token : 200.000.000.000

Allocation of Token

Token allocation will be carried out as follows:

- 50% of tokens will be left in the Public with a loose composition of 25% PRE ICO and 25% ICO
- The remaining 50% of Tokens will be held by the developer, not sold to the public with the distribution within the developer as follows :
 - a. 10% of tokens are held by the Founders
 - b. 20% of tokens are held by stake holders (subsidiaries)
 - c. The remaining 20% of tokens are held by the Developer himself

Allocation of Fund

a) *Target Fund to be achieve :*

Pre ICO :

- *Soft Cap : Rp. 5.000.000.000,-*
- *Hard Cap : Rp 50.000.000.000,-*

ICO :

- *Soft Cap : Rp 25.000.000.000,-*
- *Hard Cap : Rp 250.000.000.000,-*

b) *30% of the proceeds from the PRE ICO and ICO will be allocated for the acquisition of Fixed Assets as Investment Hedging*

c) *50% of the funds from the PRE ICO and ICO proceeds will be allocated for the development of existing businesses, the businesses being run include :*

- *Conventional Business*

For Conventional Business, MSA will utilize the plantation area it owns in a more structured manner and modernize the plantation so that the results will be maximized.

- *Digital Business*

By leveraging existing Founders' Connections, MSA will also invest in several digital companies that support MSA's own performance. Among other things is the initial goal of creating a Crypto Asset Exchanger in Indonesia, where this exchange will help local tokens that will be listed as products of Tokenization..

- *Digital-based Start-up and MSME Business*

MSA will help digital startups in Indonesia and help them to "Go Digital". Startups fostered by MSA founders in Indonesia, such as: <https://bantayahall.com/> , can be an example that will be developed further

- d) *The remaining 20% of the Fund Allocation from the PRE ICO and ICO proceeds will be used by the Company's Liquidity as operational costs, research, and other activities needed for the progress of MSA*

Company Strategy Maintain Token price

- Token liquidity will be maintained by listing in several CEXs gradually
- Vesting Period will be done by big investors
 - a. Vesting period will last for 12 months
 - b. Every month the token will be sent to each investor's wallet
- Staking coins will be done through IEO / Exchanger, with monthly profit sharing
 - a. Every purchase at IEO, and held for a period of 3 months, will get a water drop token worth 10% of the total token purchased
 - b. Every purchase at IEO, and held for a period of 6 months, will get a water drop token worth 25% of the total tokens purchased.
- Buy Back Tokens will be carried out every year, so the number of tokens in circulation every year will continue to decrease every period.
- Increase the number of retail holders every year by selling to communities.
- Report company fundamentals periodically to token holders.
- Maintain the supply of tokens in the public, so that the amount is not too much or excessive.

16. Closing

In closing, PT. Mitra Sangkara Abadi has a clear vision and mission and brings together the various skills and experiences of its founders in carrying out all actions, so that the risks of the business being undertaken can be measured and anticipated. PT. Mitra Sangkara Abadi is also committed to advancing its business line and making tokens that are liquid and stable in trading. Business Diversification by PT. Mitra Sangkara Abadi is also one of the reasons for measurable risk sharing.

Finally, I hope this white paper can be a clear guide in understanding the work plan and policy direction of PT. Eternal Cage Partner.

This whitepaper was created as an explanation to Sangkara \$MISA token holders and interested parties. If there is an error in this note, it will be corrected at a later date.

17. Disclaimer

- Crypto value can go up and down at any time so crypto investment is a risky investment, this should make investors understand all the risks inherent in this investment.
- *This whitepaper is for information about the company, its activities and plans, and is not a pamphlet or offer.*
- The company plans contained in this whitepaper may change depending on but not limited to the situation and condition of the company, market, politics, and the global world..
- \$MISA tokens are not sold in countries or regions where crypto trading is prohibited.
- PT Mitra Sangkara Abadi is not responsible for the wallets held by each investor.
- PT Mitra Sangkara Abadi is not responsible for the loss of investor tokens at the time of delivery if the wallet address informed to PT Mitra Sangkara Abadi is inaccurate or incomplete..

SANGKARA MISA

MSA is a company that was founded in Jakarta on September 27, 2021. The initiation of MSA has been started since 2017, starting with a financial-based digital company. The separation of business lines is carried out by the MSA parent company and the use of independent subsidiaries as it is today. MSA will become a company that owns digital tokens, as well as a company that offers its services to various businesses that want to do TOKENIZATION. Blockchain technology for MSA is the future in the digital world. This technology, which was started in 2011, is increasingly attracting market interest and will one day become the basis of many digital data and asset processing. The emergence of NFT (Non Fungible Token), DEFI, and various new developments in the Blockchain world certainly ensure that this is the future that starts today

**PLAY METAVERSE
GET REAL HARVEST**
